Figure: Juniper STRM 2500
Product specification

Recently, Juniper Networks announced the availability of their STRM family of appliances. The STRM family, OEMed from Q1 Labs, is Juniper's first offering in the SIEM space. Currently, the STRM has three models viz. STRM 500, STRM 2500 (both already available) and STRM 5000 (will be available in 2H 08). The architecture of Juniper's SIEM solution is well thought and inline with the current technology curve. The products also make a good impression in terms of the ease of use features provided.

What is the scope of the Juniper STRM 2500?

What are the key benefits of the Juniper STRM 2500?

What are the possible advantages of the product?

Who should buy it and who shouldn't and why?

Tek Card:

Date: Apr 2008

Overall – ★★★★★

Juniper Network's STRM 2500

- Features – ★★★★★
- Performance – ★★★★★
- Ease of Use – ★★★★★
- Value for money – ★★★★★
- Support & Care – ★★★★★

Juniper is putting its best foot forward with the launch of its new Security Threat Response Manager (STRM) family, despite its late entry in the crowded Security Information and Event Management (SIEM) market. The new STRM family will almost fulfil the expectations of its customers especially on features and usability. However, on price/performance the STRM seems to be a little bit costly when compared with other SIEM products. Given Juniper's sound position in the networking and security segment; TekPlus believes that the new STRM family of appliances will make a good entry in the marketplace.

Note: TekPlus star rating states the current opinion of the product as viewed by TekPlus. TekPlus experts take a number of parameters into account when analysing a product in the competitive landscape going forward. The scale of the star ratings are as follows:

★ Very Poor, ★★ Below Par, ★★★ Average, ★★★★ Good, ★★★★★ Excellent
